Poultry Name: ERNEST DOYLE

ODAFF Poultry ID No. 260 54

The ODAFF AEMS Program Officer, or an AEMS staff member (designated by the AEMS Program Officer or the AEMS Director) will develop and complete a checklist/letter for the attached poultry document.

The completed checklist/letter and this original poultry form will be returned to the AEMS Director for his signature (only if a letter is necessitated).

**NOTE:** The completed checklist should include the signature of the person completing this document and the date the review was performed.

## Registered Poultry Feeding Operations Checklist

Producer: Ernest Doyle Date: December 20, 2001

6. Education:  
 Initial 9 hours: Yes X If so, how many completed: 9 No       
 Initial Year: 1988  
 Recertification hours (3) Yes X If so, how many completed: 6 (include any carry over) No       
 2 hours carry over
7. Complaints:  
 Have there been any complaints this calendar year? Yes      No X  
 If yes, have these been resolved? Yes      No
8. Is the AWMP being followed by this operation? Yes X No
9. Inspector's Comments/Observations:

A Catastrophic Loss Procedure is needed in the Animal Waste Management Plan. The AWMP also needs to be updated to include current litter and soil tests. Field #1 tested at acceptable limits in 2001. The AWMP map needs to be updated to include fields being used and delete fields not belonging to Mr. Doyle.

A litter test needs to be taken prior to litter removal each calendar year. Soil tests need to be taken each calendar year prior to litter application on fields that will receive litter.

Ernest Doyle  
Rt 3, Box 1280  
Stilwell, OK 74960

Dear Mr. Doyle:

The Oklahoma Department of Agriculture, Water Quality Services Division, has received a written report regarding your 2002 annual inspection. Based upon this inspection, you are in violation of the following Oklahoma Registered Poultry Feeding Operations Act laws and rules; failure to perform an annual soil test on each land application area prior to the first application of the calendar year failure to perform poultry waste testing prior to the first application of the calendar year and failure to include a catastrophic death loss procedure in your operation's Animal Waste Management Plan (AWMP).

To rectify the identified violation(s), you must take the following corrective action(s):

1. perform an annual soil test on each land application area prior to the first application of the calendar year;
2. perform poultry waste testing prior to the first application of the calendar year;
3. obtain a catastrophic death loss procedure from your local Natural Resource Conservation Service (NRCS) office.

The corrective action(s) must be completed by March 1, 2002. A poultry inspector will return for a follow-up inspection to make sure you have completed the required remediation. Failure to make the necessary change(s) may result in the scheduling of an informal conference to discuss the above violation(s) and appropriate penalties.

If the NRCS office will not provide you with a catastrophic death loss procedure, then you must obtain a letter from that office stating that the NRCS no longer drafts catastrophic death loss procedures for Animal Waste Management Plans

If you have any questions or if I may be of further service in this or any other matter, please contact me at 918/258-5548.

Sincerely,

A handwritten signature in black ink that reads "L. Michelle Sutton". The signature is written in a cursive style with a large, stylized "S" at the end.

Dear Ernest A. Doyle:

Enclosed please find your Private Waste Applicator's License. **Please note that you are required to receive three (3) hours of Poultry Waste Applicator's update education each year.**

Please contact your inspector, David Berry at (918) 639-0924. Inspector Berry will be happy to meet with you regarding the educational requirements and answer any questions you have regarding your applicator's license and annual reports.

If you have questions, please feel free to contact me at 405/ 522-4659 or this office.

Respectfully,

  
D. J. Parrish, Director  
Agricultural Environmental  
Management Services

Ernest Doyle  
Rt 3 Box 1280  
Stilwell, OK 74960

Dear Ernest Doyle:

According to the Oklahoma Department of Agriculture, Food and Forestry's review of your file, you are being reminded of the requirement to receive education by June 30, 2005.

The Oklahoma Registered Poultry Feeding Operations Act, in part, states the following in Section 5:

*F.1. After the effective date of this act, all operators of poultry feeding operations shall attend educational courses on poultry waste handling. All such operators shall attend educational training on poultry waste management as provided by Oklahoma State University through the Oklahoma Cooperative Extension Service. All current and new operators shall receive no less than nine (9) hours of training in the first year and no less than three (3) hours each year thereafter. The Oklahoma Cooperative Extension Service shall develop the educational training course to aid in certification.*

*3. Failure to obtain the prerequisite and annual training and education as provided in this subsection shall be deemed a violation of the Oklahoma Registered Poultry Feeding Operations Act.*

The Oklahoma Registered Poultry Feeding Operations Act also states that fines and violation points can be assessed to those who are in violation of the Poultry Act and that your poultry supplier shall be notified of your violations and birds may not be delivered to your operation.

If you feel you have completed the required hours of education, please submit copies of your OSU Extension Service official education certificates to me, with a letter of explanation.

*Education up to date  
re 3 hrs 6-7-05  
DJP 6-18-05*

*The Land We Belong To Is Grand! - Contributing \$7.1 Billion for Oklahoma's Economy*

OKDA0003053

Ernest Doyle  
March 30, 2005  
Page 2

You must obtain the required education training by no later than **June 30, 2005**. Penalties for violations include monetary fines as allowed under the Oklahoma Registered Poultry Feeding Operations Act. The records that the Oklahoma Department of Agriculture, Food and Forestry, AEMS Division has received from the OSU data base indicate that you are required to receive the following education: **one hour update education for Fiscal Year 04-05**. A copy of your OSU database education received, as determined by OSU and a list of OSU official classes are enclosed.

Respectfully,

D. J. Parrish, Director  
Agricultural Environmental  
Management Services

Re: Ernest Doyle Poultry Feeding Operation, ID # 260

Dear Ernest Doyle:

The Animal Waste Management Plan (AWMP) for your Poultry Feeding Operation is required to be updated every six (6) years. Your AWMP was issued on 2/1/99. Please send us a copy of your updated AWMP or proof that you have requested one. The AWMP shall be prepared by USDA-NRCS or an entity approved by the Oklahoma Department of Agriculture, Food, and Forestry. If you do not have an updated AWMP, contact your local USDA-NRCS office and request that one be completed for you or contact me for approval of another entity. Please submit this AWMP, or proof that one has been requested, by May 1, 2005.

If you have questions please call me at (405) 522-4659, write to the address provided on the letterhead.

Respectfully,

A handwritten signature in dark ink, appearing to read "D. J. Parrish".

Re: Soil & Litter Test, ID # 260

Dear Ernest Doyle:

The Oklahoma Department of Agriculture, Food, and Forestry, Agricultural Environmental Management Services (AEMS), has received a written report regarding your 2005 annual inspection. Based upon this inspection, you need to complete a soil and litter test and have them laboratory analyzed prior to the first land application of the year and retain the information in your records.

If you have any questions or if I may be of further service in this or any other matter, please contact me at 405/522-4659.

Sincerely,

  
D. J. Parrish, Director  
Agricultural Environmental  
Management Services

## POULTRY ANNUAL INSPECTION CHECKLIST

GROWER'S NAME: FANEST DOYLE ODAFF POULTRY ID: 260  
12-14-08

The following violations were found:

- ☐ Soil test needed.
- ✓ ☒ Litter test needed. 31-075A
- ☐ Education is lacking. SALLY to review education.
- ✓ ☒ AWMP is not being followed.
- ☒ AWMP six year revision or proof of application for AWMP six year revision is needed. 12-14-08
- ☐ Carcass Disposal Plan is not being followed.
- ☐ Catastrophic losses are not being reported.
- ☐ Stored litter is not being protected from runoff.
- ☐ See other issues on Open Criteria Report.
- ☐ Need producer's signature.
- ☐ Report of Litter Stored, Sold or Given Away:
  - ☐ Provide date removed from buildings.
  - ☐ Provide the name of the hauler or recipient, including the name of the person for whom it was applied.
  - ☐ Provide the address for the hauler or recipient including the name of the person for whom it was applied.
  - ☐ Provide the waste removed (in tons or cubic yards).
  - ☐ Provide based on dry or as is weight.
  - ☐ Provide information as to whether waste result tests were given.
  - ☐ Provide cleanout information.
  - ☐ Provide information as to whether a litter sample analysis was provided.

Re: Failure to submit annual report for application of Poultry Waste.  
Applicator License #54

---

Please be advised that our records indicate you have not submitted your annual report for application of Poultry Waste for the time frame of July 1, 2001 through June 30, 2002. According to the Oklahoma Poultry Waste Applicators Certification Act (Act) you are required to submit this report by December 31<sup>st</sup> of each year. If you continue to apply poultry waste without filing the proper reports you will be in violation of the Act and subject to enforcement action as provided under the law, which may include a monetary fine. Please send the required annual report forms by January 20, 2003, or notify us by that date if you are no longer applying poultry waste.

If you feel you have complied with this request, please contact me at (405) 522-5892, or write to the address provided on the letterhead. You may also e-mail me at [palbers@oda.state.ok.us](mailto:palbers@oda.state.ok.us).

Deficiency letter based on annual inspection sent to Mr. Doyle by ODA OKC office. Once he received the letter, Mr. Doyle called me. Based on our conversation, please note for his file:

1. Annual inspection should note that all litter is sold off site. Therefore, he is NOT required to take a soil sample.
2. He must make available litter/poultry waste sample results to individual buying his litter. He states he will be pulling a sample b/f he sells in 2002.
3. He has requested a catastrophic death loss procedure from Stilwell NRCS. Has asked them to send copy to ODA OKC office.

Dear Mr. Doyle:

Our office has received your annual Poultry Feeding Operation inspection that was conducted on December 23, 1999. Based on the March 1998 soil test results no litter should have been applied to field #3. Please do not spread any further litter on this field. Additionally, the laws and rules of the Poultry Feeding Operation Act require all registered poultry operations to submit a copy of your Animal Waste Management Plan to our ODA office. When you receive your AWMP, please send it to our office.

An ODA Inspector has been asked to conduct a follow-up inspection. Should you have any questions, please contact our office.

Respectfully,

A handwritten signature in black ink, appearing to read 'Dan Parrish', is written over a horizontal line.

March 31, 2005

Dear Mr. Ernest Doyle,

*This is to acknowledge your request for conservation planning assistance in updating your animal waste management plan for you operation located in Adair County, Oklahoma. NRCS will work with the Adair County Conservation District to schedule your request for assistance consistent with conservation district priorities. Due to our current workload, development of your animal waste management plan may take several months to complete.*

*This letter will serve as "proof of application" for an animal waste management plan as Required by Senate Bill 1170. It is your responsibility to submit this letter, along with Appropriate registration forms and any other information required by the Oklahoma Department of Agriculture (ODA).*

*Before animal waste can be applied, a litter analyses must be completed. Please provide a copy of these analyses to the NRCS office in Stillwell. It is suggested that soil samples be taken on all areas that are available for litter application. Some fields may not be suited for continued application of litter.*

*NRCS looks forward to assisting you with your natural resource needs. If you have any Questions concerning developing of your animal waste management plan, please contact our office at 918-696-7612.*

Sincerely,

A handwritten signature in black ink, appearing to read "Anthony R. Lawrence".

**ANIMAL WASTE MANAGEMENT PLAN**

for

**EARNEST DOYLE**

developed by USDA-NRCS on February 1, 1999

**Introduction**

This waste management plan is developed for the Earnest Doyle poultry operation located in sections 30 and 19, Township 17 North, Range 25 East in Adair County, Oklahoma. This plan calls for the application of phosphorus which exceeds that amount which will be used by the plants. Application is based on assimilation of phosphorus in the soil profile. Prolonged applications of poultry waste to the same area can increase phosphorus content in the soil profile. This plan is developed to provide guidance in the management of wastes from production to utilization in a manner that prevents or minimizes degradation of air, soil, and water resources.

**Waste produced**

Waste is produced in four houses containing a total of 20,500 turkeys. Litter is collected on the floor of the houses and decaked after each batch. A cake-out storage structure is planned to be built in 2000 if funds become available. Dead birds from normal mortality are disposed of in a composter located at the operation. Catastrophic losses will be buried in a pit located with assistance from the NRCS. Based upon December 1998 litter nutrient tests, the equivalent fertilizer values available for plant use of the animal waste to be applied is 65-84-59 (N-P<sub>2</sub>O<sub>5</sub>-K<sub>2</sub>O) pounds per ton of litter. Litter analyses from this operation should be performed every three years.

**Soil Nutrient Tests**

Soil samples for fields 2,3,4 and 5 were taken in December 1998. These tests revealed that these areas should not have animal waste applied because the Phosphorus levels were higher than 400 lbs/ac. Field 2 had a P-index of 884 while field 3 was 728, field 4 was 811, and field 5 was 1064. If the soil P index on a field ever exceeds 220, soil tests must be completed annually before waste can be applied to that field. Soil samples should be taken according to OSU Fact Sheet No. 2207 at a depth of 6-8 inches.

**Application areas**

There are no fields available to accept animal waste.

**Summary**

According to estimates of litter production, 560 tons of animal waste will be produced from this operation annually. All 560 tons will need to be utilized off-site on soils that are capable of accepting animal waste. The producer plans to sell all of the litter produced at this operation and will not apply litter to his land.

OKDA0003077

**Additional guidance**

Every attempt has been made to identify acceptable litter application rates and areas for application on the plan map. However, the following guidelines must be followed in addition to the details on the plan map:

- Apply litter to fields at the specified rates in a uniform manner.
- Do not apply litter to areas with the water table less than 2 feet from the surface.
- Do not apply litter to areas with less than 10 inches of topsoil.
- Do not apply litter to areas within 50 feet of an intermittent stream.
- Do not apply litter to areas within 100 feet of a perennial stream, well, or pond.
- Do not apply litter when the soil is frozen or snow covered.
- Do not apply litter to eroding or gulying areas.
- Do not apply litter in areas which are frequently flooded.
- Keep records of when, where, and how much waste is applied.
- Have litter tested before any land application.
- Have soil tested once per year when P-index is greater than 220.
- Have soil tested once every three years when P-index is less than 220.

Use the following table to determine from soil tests the rate(s) at which to apply the waste:

**SUMMARY OF WASTE APPLICATION RATES ON VARIOUS SLOPES AND SOIL P VALUES**

<u>P value</u>	<u>0-8 percent slope</u>	<u>8-15 percent slope</u>
0-65	full rate	full rate, split applications
65-250	full rate	half rate
250-400	half rate	half rate
400 +	plant needs	plant needs

\* No application on slopes greater than 15 percent.

**Who to contact**

In the event of a catastrophic death loss, contact the Director of Water Quality of the Oklahoma Department of Agriculture within 24 hours at 405-521-3864.

If there are significant changes in this operation, or more information is desired on any portion of this waste management plan contact the Natural Resources Conservation Service, Stilwell Field Office at 918-696-7612.

## THE LAND CAPABILITY CLASSIFICATION

The capability classification is a method of grouping soils for use, treatment, and management. There are eight broad classes as defined below. The erosion hazards and limitations for use increase as the class number increases. Class I land has few hazards or limitations, whereas Class VII has many.

The capability unit is a grouping of soils that have similar production and response to systems of conservation management. The principal soil problems are denoted in lower case letters by the subclassess: e - Erosion (He); w - Wetness (Hw); s - Soil limitations (Hs); and c - Climatic limitations (Hc). The capability unit is identified by a number following the capability class and subclass as: H1e-2 or H1s-1.

Class I soils have few or no limitations or hazards that restrict their use. With good management practices these soils can be used safely for cultivated crops, pasture, range, woodland, or wildlife.

Class II soils have some limitations or hazards that restrict their use. Choice of crop or easily applied conservation practices, or both, are needed where cultivated. Suited for cultivated crops, pasture, range, woodland, or wildlife.

Class III soils have severe limitations or hazards that restrict their use. Choice of crop and intensive conservation practices are needed when cultivated. Suited for cultivated crops, pasture, range, woodland or wildlife.

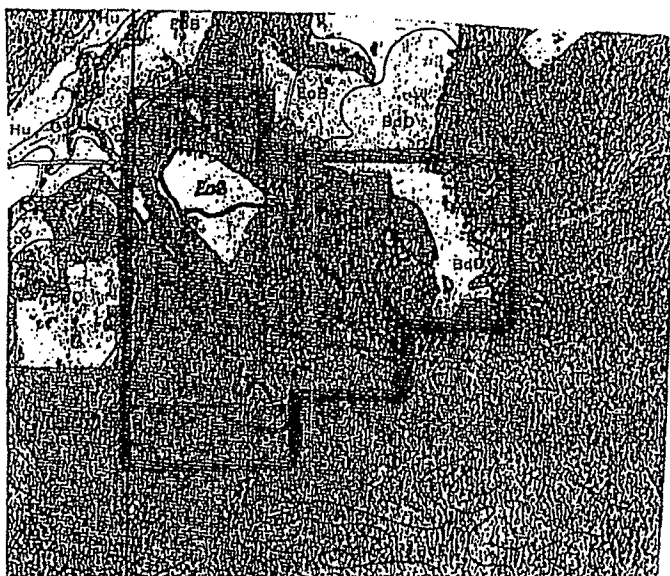

Class IV soils have very severe limitations or hazards. Best suited for permanent vegetation. When cultivated requires careful selection of crops and very intensive conservation practices.

Class V soils have little or no erosion hazard but have other limitations that are normally impractical to remove that limit their use largely to pasture, range, woodland, or wildlife.

Class VI soils have severe limitations that make them generally unsuited for cultivation and limit their use largely to pasture, range, woodland, or wildlife.

Class VII soils have very severe limitations that make them unsuited for cultivation and restrict their use largely to grazing woodland, or wildlife under proper management.

Class VIII soils have no agricultural value because of very extreme limitations. They may have value for recreation or wildlife.

Mr. Doyle:

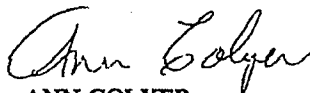

This is to acknowledge your request for conservation planning assistance in developing an animal waste management plan for your poultry operation located in Adair County. NRCS will work with the Adair County Conservation District to schedule your request for assistance consistent with conservation district priorities. Due to our current workload, development of your animal waste management plan may take up to 3 months to complete. If you have not heard from our office within 3 months from the date of this letter, please contact us again.

This letter will serve as "proof of application" for an animal waste management plan as required by the recently passed Senate Bill 1170. It is your responsibility to submit this letter, along with appropriate registration forms and any other information required by the Oklahoma Department of Agriculture (ODA) to register your poultry operation. Registration with ODA is required by January 1, 1999.

Before an animal waste management plan can be prepared for your operation, a litter analysis also must be completed. Please provide a copy of these analysis to the NRCS office as soon as you receive them. I have a copy of your soil test.

NRCS looks forward to assisting you with your natural resource needs. If you have any questions concerning development of your animal waste management plan, please contact me.

Sincerely,

  
ANN COLYER  
District Conservationist
